Optional GDI Interface (RISORINC 3N) can be built-in to the above RZ Models with Parallel Printer Port fitted as standard.
With GDI Interface in place the RZ can be networked (RJ45 connection) using the optional NET-C Network Card.
All RZ machines come with a cabinet. The RZ200 cabinet is open fronted.

Your nearest Riso reseller:

The **RISO RZ** range.
All the speed you'll ever need
at a price you can afford.

→ RISO. Digital print, perfected.

Riso is a world market leader in digital print. Manufacturing printers which are faster and more versatile than copiers, Riso brings superior quality, high-speed, networkable print to everyone at an affordable price.

Printing at speeds of 130 pages per minute onto a wide range of media including card, envelopes and multi-part stationery, Riso digital printers have become invaluable to countless businesses and organisations from football clubs and schools to commercial printers.

But what makes so many diverse organisations all choose Riso?

Cost efficiency

Riso printers achieve an exceptionally low cost per copy on medium runs (20 upwards) up to long run print jobs. And the more copies you print from one job, the lower this cost becomes. An optional Key Card Counter is available to help manage costs by showing the number of copies made and consumables used.

Flexibility

Riso's RZ printers are so flexible they can print onto weights of paper from 49 gsm right up to 210 gsm on the RZ370. They also print on labels, envelopes and multipart stationery so you can produce most of your standard print jobs in-house, on demand. Optional extras are available to make the RZ even more flexible and include an Automatic Document Feeder and Job Separator, plus offline collating and booklet making equipment.

Intelligent Quality Management

The unique RISO i Quality System™ manages consistency and quality within print runs so even a first time user will produce top quality print. Consumables usage is also monitored and the printer stops in the event of shortages to minimise paper wastage.

Environmentally friendly

Riso printers use sustainable vegetable-based inks, operate with no ozone emissions and all machine parts are recyclable. And a Riso printer uses about the same power as a light bulb, which means you can care for the environment without compromising on efficiency or economy.

Reliability

The Riso RZ printing process uses a straight through paper path, which means no paper distortion, and substantially reduced misfeeds and downtime. So no more missed deadlines - all your documents go out on time, every time.

Productivity

Print speeds of up to 130 copies per minute mean even the lowest priced Riso will out perform top of the range copiers and leave desktop printers standing.

User Friendly

Easy operation is a key feature of the RZ range. Loading consumables and swapping print drums is clean and easy via the opening front panel and the control panel is simple and easy to use.

Connectivity

Each RZ model has the option to connect directly to a PC via an easy-to-use interface so users can download and reproduce images that enhance communications. RZ's can also be networked so that everyone can benefit from access to superior quality, high speed, cost-effective print.

Flatbed scanning

With flatbed scanning you can print from a wide range of originals and the Book Shadow Edit feature makes copying from books even easier.

Colour

A vibrant colour palette of 18 colours is available plus special colours to match your corporate branding, meaning you can add spot colour to all your documents for extra impact.

For accurate colour matches please send for a Riso colour swatch.

→ The RISO range. High speed. High volume. Low cost.

Riso's RZ range of printers is designed to offer you outstanding speed, versatility, convenience and cost efficiency on demand. Robust and simple to use, with easy, intuitive operating features, the entire range offers you unprecedented print quality at super-fast speeds - which means you can print a thousand perfect copies in under eight minutes.

The A3 RZ370

Revolutionary D600dpi resolution ensures this model offers exceptional A3 print quality at an extremely cost-effective price. Lines are smooth, photos and graduations are natural and even the smallest typefaces are perfectly reproduced. The A3 format offers the ultimate flexibility giving you the option to print anything from product and price lists to posters. And if speed and throughput are critical, you can print 15,000 plus A4 documents side by side in an hour.

The A4 RZ300

If you need all the benefits of D600dpi resolution but only want to produce A4 documents, the RZ300 is the perfect choice. Productivity is still exceptionally high at 7800 copies an hour.

The A4 RZ200

The RZ200 A4 model provides 300dpi resolution, ideal for many applications, especially where budgets are tight but consistent quality and productivity are essential.
